NORDSET
GmbH & Co. KG

Focus on Quality !

Dear Customers,

the production plant was built in 2001 and since that time we have been produced successfully sterile disposable packs and drapes for eye surgery. We produce the kits for our customers in Germany and all over Europe.

According to the requests of our customers, all drapes and packs are individually cut, punched and folded in our production facility in Northern Germany.

The manufacturing of the packs takes place in our high-standard clean room.

Disposable surgical drapes: Made in Germany.

We certainly have the CE mark and work according to those instructions. Enclosed please find a form for eye surgery packs that you can fill out and let us know the drapes and components required. We will be able to produce non-sterile samples within 5 days and sterile ones within 4 weeks upon receipt of these information in order to present the superior quality of our custom made kits.

Price quotations will be made immediately.
All our packs are ETO sterilized and can be used after 7 days' of quarantine.

Our highest goal is to satisfy our customers.

Kindest regards
Kirsten Scholz & Team
